SUMMARY

Aspiring Software Engineer and Data Analyst aiming to leverage skills in full-stack development and data analytics to build impactful, real-world solutions. Hands-on experience building interactive Tableau dashboards and Excel-based analytics, with a strong interest in AI/ML implementations.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL, NoSQL
Frameworks & Libraries: React, Node.js, Express, Pandas, NumPy
Visualization & Tools: Tableau, Excel, HTML, CSS
Soft Skills: Problem Solving, Communication, Team Collaboration, Analytical Thinking

EDUCATION

B.Tech in Computer Science & Artificial Intelligence
Newton School of Technology 2024 – Present

PROJECTS

Mission YUVA Credit Flow Analytics ↗ *Tools: Excel, Data Analytics*

- Analyzed complex operational and financial datasets to identify bottlenecks and default risk drivers within the Mission YUVA credit pipeline.
- Developed interactive KPI dashboards to track credit flow efficiency, borrower segmentation, and process optimization opportunities.
- Delivered data-driven recommendations that supported risk mitigation strategies and improved overall loan pipeline performance.

Diabetic Care Capstone ↗ *Tools: Python, Tableau, Data Analytics*

- Executed an intensive industry simulation project to convert raw diabetic patient data into actionable business intelligence.
- Conducted exploratory data analysis (EDA) using Python to uncover demographic trends, health metrics, and clinical predictors of readmission.
- Designed comprehensive Tableau dashboards to visualize patient outcomes, empowering stakeholders to optimize treatment strategies and resource allocation.

CERTIFICATIONS & ACHIEVEMENTS

- Built multiple real-world projects in Data Analytics and Full Stack Development.
- Hands-on experience designing Tableau dashboards and Excel-based analytics solutions.
- Actively learning AI/ML and working on practical model implementations.
